

2015 Chemistry Summer Camp for Senior High School Students in Yulin and Chiayi

This chemistry camp was a two-day program which provided senior high school students with various chemistry activities. The themes of this chemistry camp included talks and experiments related to green chemistry and biomass energy, such as preparation of biodiesel, saponification, chemical reaction catalyzed by enzyme, and preparation of slime. Through hands-on experiments, the chemistry camp helped students to promote interest in learning chemistry.
